Company Overview:

InflexionPoint Technologies BD Ltd. is a leading technology-driven organization that provides cutting-edge cloud solutions to clients across various industries. We are committed to empowering businesses with the latest advancements in cloud computing, enabling them to scale, innovate, and optimize their operations. As part of our continuous growth, we are seeking a skilled and passionate Trainer for Cloud Engineers to join our dynamic team.

Job Summary:

As a Trainer for Cloud Engineers, you will play a crucial role in enhancing the technical expertise and skill sets of our cloud engineering teams. You will be responsible for designing and delivering comprehensive training programs that equip our engineers with the knowledge and tools required to excel in their roles. The ideal candidate should have hands-on experience in cloud technologies, a solid understanding of various cloud platforms, and a proven track record in conducting successful technical training sessions.

Responsibilities:

1. Develop and implement effective training programs: Create engaging and practical training modules focused on cloud engineering principles, best practices, and specific technologies relevant to our organization's cloud environment.

2. Conduct training sessions: Lead training sessions, workshops, and webinars, both in-person and virtually, to impart knowledge about cloud technologies, deployment methodologies, security protocols, and performance optimization.

3. Assess training needs: Collaborate with management and technical leads to identify skill gaps within the cloud engineering teams and tailor training programs accordingly.

4. Hands-on demonstrations: Provide hands-on demonstrations of cloud platforms, tools, and services, guiding participants through practical exercises to enhance their understanding and proficiency.

5. Stay up to date with industry trends: Continuously research and remain informed about the latest advancements and trends in cloud computing, incorporating relevant updates into training materials.

6. Monitor and evaluate progress: Track the progress of trainees and provide constructive feedback to ensure continuous improvement and effective knowledge retention.

7. Collaborate with the technical team: Work closely with the cloud engineering team to gain insights into their ongoing projects, challenges, and requirements to align training content with real-world scenarios.

8. Develop training documentation: Create detailed training guides, manuals, and reference materials to support trainees during and after the training sessions.

9. Assist in recruitment and onboarding: Participate in technical interviews and support the onboarding process of new cloud engineering team members.

10. Foster a culture of continuous learning: Promote a learning culture within the organization, encouraging cloud engineers to pursue certifications, attend workshops, and grow professionally.

Requirements:

- Bachelor's degree in Computer Science, Information Technology, or related field.

- Proven experience as a Cloud Engineer or in a similar technical role, with at least 3 to 5 years of hands-on experience with major cloud platforms (e.g., AWS, Azure, GCP).

- Strong knowledge of cloud architecture, cloud services, virtualization, and networking concepts.

- Excellent presentation and communication skills, with the ability to convey complex technical concepts in a clear and understandable manner.

- Previous experience in designing and conducting technical training sessions is highly desirable.

- Cloud certifications (e.g., AWS Certified Solutions Architect, Microsoft Certified Azure Solutions Architect) are a plus.

- Passion for continuous learning and keeping up with the latest trends in cloud computing.
